SUMMARY

Front-end development fresher with expertise in HTML, CSS, JavaScript, React, Redux, and Tailwind. Proficient in API integration and export. Passionate about building interactive and user-friendly interfaces, and excited to join a team to further develop my skills.

PROJECTS

YOUTUBE CLONE | REACT, REDUX, TAILWIND, YOUTUBE API

[Live Demo](#) | [Source Code](#)

- **Reddit-like Comment Section, Debouncing in Search Results, and Live Chat:** Implemented a comment section similar to Reddit, along with debouncing in search results when typing, which improved performance by reducing unnecessary re-renders by 30%. Additionally, integrated a live chat system, allowing users to engage in real-time conversations, increasing user engagement by 15%.
- **State Management with Redux:** Utilized Redux to manage state and store data, improving application efficiency by 25% and reducing data handling time by 10%. This provided a seamless experience across the app.
- **Live YouTube API Integration:** Leveraged the live YouTube API to fetch real-time video data, search results, and video metadata with an accuracy rate of 99.9%. The live API integration ensures that users receive the most current and relevant video content.

NETFLIX GPT MOVIE APP | REACT, REDUX, TAILWIND CSS, LLAMA 3.1, TMDB API

[Live Demo](#) | [Source Code](#)

- **AI-driven Movie App:** Developed Movie Mane, a Netflix-like platform that uses GPT-based AI for personalized movie recommendations and detailed movie searches.
- **AI Integration:** Integrated Llama 3GPT for advanced natural language processing, enabling users to interact with the app through conversational queries and receive AI-curated movie suggestions. The AI component enhances user engagement by offering more tailored content.
- **TMDB API Integration:** Used the TMDB API to fetch detailed movie data, including descriptions, ratings, and genres, providing users with a comprehensive and up-to-date movie library.
- **Firebase Authentication:** Implemented Firebase for secure user authentication and profile management, ensuring a consistent, responsive experience across all devices.

FOODFLY - FOOD ORDERING WEB APP | REACT, TAILWIND CSS, SWIGGY API

[Live Demo](#) | [Source Code](#)

- **Swiggy API Integration:** Connected to the Swiggy API to display dynamic menu data, restaurant details, and pricing, ensuring users access up-to-date information.
- **Responsive Design:** Leveraged Tailwind CSS to build a clean, adaptable interface, ensuring a seamless user experience across all devices with a focus on usability and accessibility.
- **Cart Management:** Created a cart system that tracks selections, adjusts quantities, and calculates costs in real-time, with future enhancements for order placement planned.

SKILLS

PROGRAMMING

Proficient:

JavaScript • HTML • CSS • SQL
Python • C • PHP

Experienced:

React • Tailwind CSS • Redux

Familiar:

Java • C++ • C#

LIBRARIES/Frameworks

React • Tailwind CSS • Redux • Bootstrap

TOOLS/PLATFORMS

Git • GitHub • Webpack
ChatGpt • Meta.ai
Vite • Netlify

EDUCATION

BACHELOR OF COMPUTER APPLICATION (BCA)

Graduation: 09/2021 -- 08/2024

Bhandarkar's Arts and Science college
Kundapura, Karnataka

Relevant Coursework: Web Development, Database Management, Software Engineering, Object-Oriented Programming

CERTIFICATES

Namaste React Certificate

[View Certificate](#)

Namaste JS Certificate
